

LEADVILLE NATURAL GAS PROJECT

CONSTRUCTION STARTING SOON IN YOUR AREA

This map is a graphic and may not show exact locations.

Overview

We are completing a multi-year natural gas system revitalization project in the City of Leadville and unincorporated Lake County, Colorado.

We will replace natural gas lines, relocate natural gas meters from building interiors to exteriors, and complete service installations to provide natural gas directly to customers.

This work will allow us to continue to provide safe, reliable natural gas service, and enhances system resiliency during extreme weather.

Schedule

Construction on the project began in 2019. This year's work is expected to begin in May and continue through October.

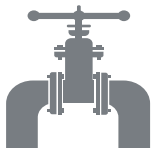

Schedules are subject to change.

Safety

Public safety is at the foundation of all we do. The safety of the public around Xcel Energy's natural gas system influences every decision we make.

If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.
