

# 28TH STREET AND BASELINE ROAD NATURAL GAS PROJECT

## CONSTRUCTION STARTING SOON

### Construction starting soon

**Construction is expected to start as early as Sunday, Dec. 1, 2024 and continue through Winter 2025.** We anticipate construction activities will occur primarily during nighttime hours Sunday through Thursday, from 9 p.m. to 5 a.m. Schedules are subject to change.

During work, you may notice:

- Marking of utility lines and utility survey holes.
- Road and sidewalk closures.
- Traffic control.
- Temporary changes to access.
- Construction noise.

We'll restore work areas to preconstruction conditions as weather allows.

### Overview

We will remove an underground natural gas valve vault and install new natural gas line to bypass the vault along Baseline Road, beneath the 28th Street overpass. This work allows us to continue to provide safe, reliable natural gas service and enhances system resiliency during extreme weather.

### Safety

Public safety is at the foundation of all we do. The safety of the public around Xcel Energy's natural gas system influences every decision we make.

If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.
