

# HIGHWAY 96 NATURAL GAS PROJECT CONSTRUCTION STARTING SOON

This map is a graphic and may not show exact locations.

## Construction

Construction is expected to start in the coming weeks and will continue through October. Schedules are subject to change.

During work, you may notice:

- Marking of utility lines and survey holes
- Road and sidewalk closures
- Temporary changes to access
- Traffic control
- Construction noise

Local access will be maintained. Through traffic should follow posted detours.

We will install the natural gas line by open trenching and boring.

We'll restore work areas to conditions required by permits as weather allows. Work areas may be left temporarily restored after construction until we can complete final restoration.

## Overview

Xcel Energy will replace approximately one mile of natural gas line in Arden Hills, Shoreview, and New Brighton, Minnesota, as the first phase of the Highway 96 Natural Gas Project. Work will occur along Highway 96 West between Lexington Avenue North and Old Highway 8 Northwest, and along Old Highway 8 Northwest between Highway 96 West and 1st Avenue Northwest.

This work will allow us to continue to provide safe, reliable natural gas service throughout the community.

## Safety

Public safety is at the foundation of all we do. The safety of the public around Xcel Energy's natural gas system influences every decision we make. If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.
