

# J ROAD NATURAL GAS PROJECT

## SERVICE INSTALLATION STARTING SOON

This map is a graphic and may not show exact locations.

### Overview

**We will replace, relocate and install new natural gas lines, and replace natural gas service lines serving individual properties, throughout 2024 for the J Road Natural Gas Project.**

The project includes replacing approximately six miles of natural gas line along J Road, between J 3/10 Road and 21 Road, on 19 1/2 Road, between K Road and Highway 50, and on 20 Road, between J Road and I 3/10 Road, and replacing natural gas service lines serving adjacent properties.

This work allows us to continue to provide safe, reliable natural gas service, and enhances system resiliency during extreme weather.

**Construction began in October 2023 and is expected to continue through late fall 2024.** Schedules are subject to change.

### Construction overview

We will work in yards and other areas of customer properties to replace the natural gas service line serving the property. We will contact customers to arrange a date and time to complete this work.

If you have questions about natural gas service line replacement or would like to meet with our team about how work will affect your property, please contact us.

During work, you may notice:

- Marking of utility lines and utility survey holes.
- Road closures.
- Traffic control.
- Temporary changes to access.
- Construction noise.

We'll restore work areas to preconstruction conditions as weather allows.

### Safety

Public safety is at the foundation of all we do. The safety of the public around Xcel Energy's natural gas system influences every decision we make. If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.
