

SHIELDS STREET NATURAL GAS PROJECT

CONSTRUCTION STARTING SOON

Construction starting soon

Construction is expected to begin as early as May 2025 and continue through fall 2025. Schedules are subject to change.

During work, you may notice:

- Marking of utility lines and survey holes.
- Road and sidewalk closures.
- Traffic control.
- Temporary changes to access.
- Construction noise.

We will install the natural gas line by open trenching and boring.

We'll restore work areas to preconstruction conditions as weather allows.

Overview

We will replace one mile of natural gas line along Shields Street between Drake and Horsetooth roads in Fort Collins, Colorado. This work allows us to continue to provide safe, reliable natural gas service and enhances system resiliency during extreme weather.

Safety

Public safety is at the foundation of all we do. The safety of the public around Xcel Energy's natural gas system influences every decision we make.

If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.

This map is a graphic and may not show exact locations.
