

WINTER PARK NATURAL GAS PROJECT

START OF CONSTRUCTION FLYER
MAY 2022
COLORADO

This map is a graphic and may not show exact locations.

Work starting soon

Starting as early as the week of May 23, 2022, construction activities will resume on the Winter Park Natural Gas Project.

Crews will work Monday through Friday from 8 a.m. to 5 p.m. In certain circumstances we may be required to work nights or weekends. Please note schedules are subject to change.

Construction

During work you may notice:

- Marking of utility lines and utility survey holes.
- Road, sidewalk and trail closures.
- Temporary changes to how you access your location.
- Traffic control.
- Construction noise.
- Parking restrictions.

We work to reduce construction-related inconveniences and will temporarily restore work areas following natural gas line installation. Final restoration will occur when conditions allow.

Overview

We are completing natural gas line installation in Winter Park. The current route starts west of Corona Pass Road and ends in Winter Park. We will also relocate a natural gas regulator station, and some existing natural gas lines in Winter Park. This work is our commitment to system revitalization, allowing us to continue to provide you safe, reliable service.

Safety

Public safety is at the foundation of all we do. The safety of the public around Xcel Energy's natural gas system influences every decision we make. If you suspect a natural gas leak, leave your home or business immediately. Once you are safely away, call **911**, then Xcel Energy at **800-895-2999**.
